

Scotch-Brite™

Brush 'N Mop Pad For cleaning uneven floor

Technical Data

TD119 - Date: July 2001 – Supersedes May 1999 - Page 1 / 1

Description :

The Brush 'N Mop Pad is a premium quality floor maintenance pad, made of high quality synthetic fibre, woven in a pile structure. The backing is designed to obtain an excellent anchorage on the pad holder.

Each floor pad has a centre hole.

Special Features :

- Designed to clean in depth uneven or textured or safety floors, or floors where abrasion is not allowed.
- Very fine fibres for effective removal of dirt/soil trapped into the floor hollows.
- Efficient to remove cleaning residues from porous ceramic floors.
- Washable in machine at 60°C.
- Durable pad at work.
- Not abrasive to the floor
- Produces medium shine on the floor.

Where and When to Use :

RPM	150-500	1200
Strip		
Scrub	XX	
Spray	XX	
Buff	X	

XX Designed for

X suitable

Use the Brush 'N Mop Pad for routine cleaning with standard or high speed floor machines (150 - 500 RPM)

Use on textured type floors (uneven floors, Safety floors), or on fragile floors (parquets, indoor sports floors).

Use with water or any cleaning solution

Directions for Use :

1. Install a clean floor pad under the machine pad holder
2. Dust mop entire floor area.
3. Fill the machine tank with the cleaning solution.
4. Scrub the floor
5. Let floor dry prior to re-open to traffic.
6. Remove pad and wash after use.

Maintenance of pad :

1. Remove pad from machine after each use.
2. Rinse with clear water or wash in a washing-machine at 60°C.
3. Hang up for drying . Do not store wet.

Performance Advantages :

- Cleans in depth textured floors and absorbs the dirt at the same time.
- Removes black marks from the floor.
- Makes rinsing easier.

Disposal information :

Discard into appropriate container, for incineration, if available.

Packaging material : recyclable.

Product Specifications :

The Scotch-Brite™ Brush 'N Mop Pads consists of polyester fibres and synthetic adhesive (backing). They are not significantly affected by water, detergents and cleaners normally used for floor maintenance.

Product Characteristics :

Colour : White and blue printing

Thickness : 22 mm

Centre hole : 85mm diameter

Weight :

Fibre type : polyester

Pile height : 18 mm

Packaging and labelling :

2 pads per case.

Packaging material made of 100% recycled material.

Multilingual label on each case. Bar code on each label.

Standard Sizes :

Standard outside diameter :

330 mm (13")

380 mm (15")

432 mm (17")

505 mm (20")

Origin :

Made in France.
